

Ocumentation

Rendered for linux/amd64

Overview

Package md5 implements the MD5 hash algorithm as defined in RFC 1321.

MD5 is cryptographically broken and should not be used for secure applications.

Index

Constants

func New() hash.Hash

func Sum(data []byte) [Size]byte

Examples

New

New (File)

Sum

Constants

View Source

const BlockSize = 64

The blocksize of MD5 in bytes.

```
const Size = 16
```

The size of an MD5 checksum in bytes.

Variables

This section is empty.

Functions

func New

```
func New() hash.Hash
```

New returns a new hash. Hash computing the MD5 checksum. The Hash also implements encoding. Binary Marshaler and encoding. Binary Unmarshaler to marshal and unmarshal the internal state of the hash.
